SDG CHAMPIONS

SUSTAINABLE DEVELOPMENT GOALS

The priority and urgency of the 21st century

Our world is damaged and we must repair it.

All living beings live in an ocean of pain and suffering: pleasures, joys and happiness last for a moment or an ephemeral period.

The problems to be solved are aggravated by the greed, violence and selfishness of human beings.

To build a world based on solidarity, sobriety and benevolence, inspired by the example and model of hospitals and clinics, we will put in place the appropriate structures and mobilize:

1. Emergency doctors for humanity and firefighters for the Earth, they will repair our damaged world with the responsiveness and professionalism of hospital and fire station emergency staff.

Their nature, motivation, commitment, and daily activity will allow them to quickly solve acute problems, whether local or global.

In all communities, speed will be the rule to bond teams; idleness, laziness, casualness and procrastination will be banned.

They will know how to seize opportunities spontaneously and intuitively, to open the right doors, to live Eureka! and to access to higher levels of leadership.

2. Doctors, surgeons, nurses, orderlies, technicians and stretcher-bearers in hospitals and clinics.

For them, the 17 SDGs of the UN 2030 Agenda are the only goals to be achieved.

Their intimate conviction is that Love is the inexhaustible source of Force, Courage, Determination and Perseverance to decide, act and achieve the goals set.

They constantly want to become better and grow up, and open the right doors together to succeed collectively.

"Our house is burning and we are looking elsewhere"

President Jacques Chirac made this statement at the 4th Earth Summit on September 2nd, 2002, in Johannesburg:

"Our house is burning and we are looking elsewhere. Nature, mutilated, overexploited, can no longer reconstitute itself, and we refuse to admit it. Humanity is suffering.

It suffers from poor development, both in the North and in the South, and we are indifferent. The Earth and humanity are in peril, and we are all responsible for it."

"We won't be able to say we didn't know. Let us take care that the 21st century does not become, for future generations, that of a crime of humanity against life."

Our common ambition

Humanity is one big family,
we must take care of each other.
We also have to take care of the Earth
which is our common home and our only home.
Let's build together, for future generations,
a better, peaceful, and happy world,
where all human beings will enjoy freedom,
in peace and security.

The idea is to act like David facing an allegorical Goliath

In the 21st century we have no enemies to fight, we oppose evil deeds, but we are not at war with other human beings. The contemporary Goliath is not human, it represents the gigantic problems and challenges of our damaged world : its 4 names are "Business as usual", "No one is perfect", "Resignation" and "Capitulation".
Together we confront this allegorical Goliath with the same Confidence, Force, Courage, and Determination as the young shepherd David.

To enter the world of the future, the one principle is to unite mind and matter, Heaven and Earth.

- Execution to perfection and in every detail.
- Purification to perfection and in every subtlety.

Time for action is now!

Let's master vision and execution to create wealth together!

Let's live inner Eureka's!

Let's access to higher levels of leadership to grow up and succeed!
